LLNL Environmental Policy

Lawrence Livermore National Laboratory (LLNL) is committed to being a leader in responsible environmental stewardship. Environmental stewardship is integrated into our strategic planning and decision-making processes and into the management of our work activities through the Integrated Safety Management System.

In support of this policy, LLNL commits to:

- Work to continually improve the efficient and effective performance of our Environmental Management System (EMS).
- Comply with all applicable federal, state, and local laws and regulations, LLNS prime contract requirements, and all other compliance obligations.
- Incorporate sustainable business practices into our planning and decision-making processes, such as pollution prevention, resource conservation, sustainable acquisition, and consideration of a life cycle perspective.
- Ensure that interactions with our regulators, U.S. Department of Energy, our community, and all other interested parties are based upon integrity, openness, and adherence to national security requirements.
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner.
- Continually improve environmental performance by establishing appropriate objectives to guide, measure, and regularly review our progress.

Kim Budil
Laboratory Director
